

Visa Europe Account Information Security (AIS)

List of validated payment applications

Updated 05 September 2008

Inclusion on this list indicates only that the **specific version** of payment application has successfully completed an assessment following Payment Application Best Practices (PABP).

Please be advised that Visa makes no endorsement of applications or products, and disclaims all warranties. Members remain responsible for performing their own evaluation and due diligence, to ensure the AIS compliance of their merchants and service providers.

The applications reviewed here may be only one component of a suite of payment applications, with the suite consisting of other vendors' products or plug-ins that has not been reviewed. To be a fully compliant solution, all applications in a payment suite will need to undergo this same review.

Visa has not evaluated and does not express any opinion as to the compatibility or effectiveness of any other vendor's products or plug-ins when used in conjunction with another vendor's payment application.

PABP reviews are valid for one year, with the next annual report due to Visa one month before the below re-validation date.

Entities that have not been re-validated by the date shown below will be removed from this list.

Software vendor	Re-validation date ¹	Payment application	Application version	Description
ACK Limited	August 2009	ECP	1.38	An instore EFT application that can be incorporated into instore Epos systems, providing online authorisation and data settlement.
Alaric System Ltd	January 2009	Authentic	3.2	Integrated solution for switching, authentication and authorization of payment cards.

H-TEC	August 2008	HydraPOS	V4.2.19	HydraPOS is a wholly integrated EPOS system with Convenience retailing, fuel control and Chip & PIN EFT all in one device.

¹ An annual validation is required for those payment applications with major upgrades or product changes. If there are no changes to the product, Visa will require a letter signed by an Officer of the software company indicating no changes to the payment application and continued adherence to the Payment Application Best Practice. Visa will note that there were no change to the product
